Last Updated Friday, 09 May 2008

From Simcyp:

We have a number of immediate openings for scientists with drug metabolism and pharmacokinetics background. The candidates should have hands-on experience in using any of the in vitro systems used for assessing the oral absorption, distribution, metabolism and excretion (ADME) of drugs. Knowledge of pharmacological effects, human physiology and biology, and in particular modelling and data analysis is advantageous.

The successful applicant will join an internationally recognised, multidisciplinary team in which s/he will be expected to take part in building information around in vitro in vivo extrapolation of ADME properties and indicating its applications.

### Requirements:

• A degree in Physiology, Pharmacology, Biology, Medicinal Chemistry or Pharmacy. Relevant industrial work experience or a higher degree is advantageous.

• Demonstrable communication skills as evident by history of presenting in scientific meetings or publication in peer reviewed journals

### Salary:

Flexible and subject to experience, plus pension contribution, health scheme etc.
